Innovative Ecosystem

As a young, globally-connected, and forward-looking university, we understand that a tertiary education does not just mean preparing graduates to be work-ready. We also understand the passion that many students have of starting their own businesses, becoming entrepreneurs or venturing into their businesses. In that way, our graduates are not just employable but capable of engineering their own careers!

Here are some of the platforms and support that Sunway students have access to:

iLabs

Provides the mentorship required for start-up, networking between start-ups and corporate investors, and provides funding through the start-ups accelerator programmes. Also the home to Sunway XFarms, and the Startup Runway Mentorship Programme among others.

Startup Semester at UC Berkeley

Learn the UC Berkeley Method of Entrepreneurship, an approach emphasising hands-on venture building to learn the mindsets and behaviours leading to entrepreneurial success.

Makerspace

Access to technology (such as 3D printer, laser cutters, design software) and resources to foster entrepreneurship and stimulate market-driven innovations.

Start-up Foundry

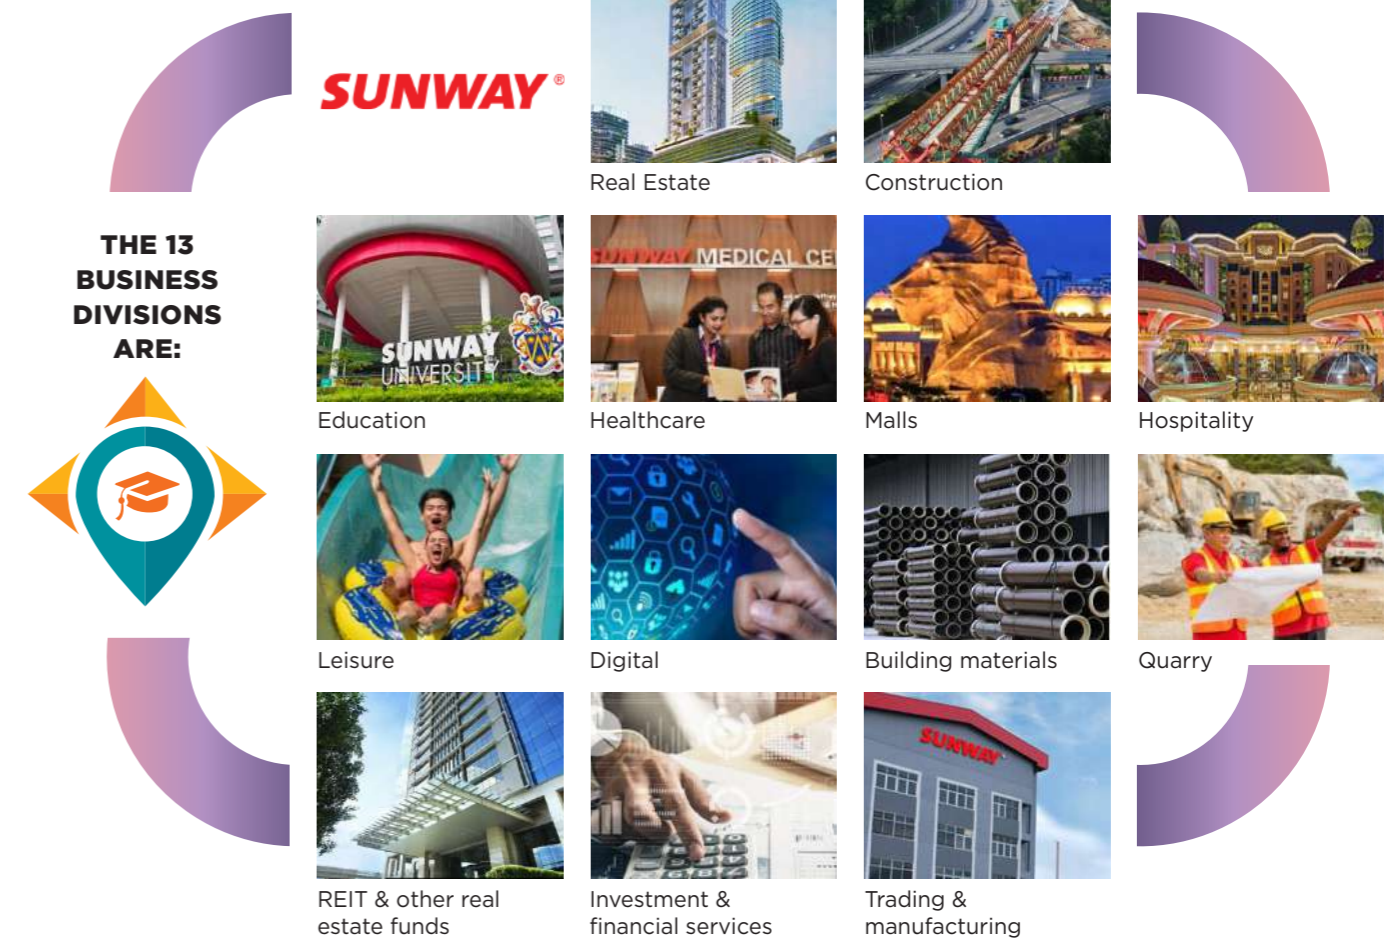

A full-semester, elective course consisting of 10 building blocks of hands-on venture building, including rapid prototyping, storytelling & pitching, venture financing, and legal perspectives in building startups.
